

SERVICE BSW-SOLAR

„Juralotse“ – legal advice at budget prices

In connection with the German Renewable Energy Act EEG and other existing laws and regulations, many solar companies have more and more questions that need quick legal assessment/clearance. As the German Solar Association is not or only to a limited extent able to take over this task, we would like to draw your attention to our service „Juralotse“.

The German Solar Association established its own Legal Advisory Board in 2004. The Board does not only help the BSW-Solar branch office with any upcoming legal issues, but also offers quick legal assistance to BSW-Solar members – at very attractive terms.

Law professional will answer legal questions BSW-Solar member companies e-mailed to the association within 48 hours (on weekdays) for only **95 € plus VAT**. This member service is handled in cooperation with our partnering law offices **Gassner, Groth, Siederer & Coll (GGSC)**, **Arnecke Sibeth Rechtsanwälte**, **von Bredow Valentin Herz Rechtsanwälte mbB (vBVH)**, **Sebastian Lange of PROJEKTKANZLEI**, **WAGENSONNER Rechtsanwälte Partnerschaft mbB** and **NÜMANN + SIEBERT Rechtsanwälte PartGmbH**. The offices are active throughout Germany. GGSC has excellent reputation especially in the fields of energy, environmental, construction and planning law. The law office Arnecke Sibeth with the experienced attorney Margarete von Oppen are experts in environmental and energy law. Attorney Frank Geiser is specialised in questions of sales and marketing (website, brochures, advertising) as well as commercial, corporate, insolvency and tax law and furthermore in the fields of competition law, copyright and industrial property rights (e. g. trademarks, utility models, industrial designs). PROJEKTKANZLEI specialises in solar systems like hardly any other law firm. It advises nationwide on all legal issues relating to solar energy. WAGENSONNER advises projects in the field of renewable energies, in particular photovoltaic and wind power projects. The focus is on project transactions and project developments, in particular all public law issues, licensing procedures, environmental law issues, civil law property protection and all corporate law issues, as well as energy law issues. NÜMANN+SIEBERT draws up general terms and conditions and contracts for solar installers and project developers as well as concepts and samples for the supply of electricity and heat within the customer's system, from commercial onsite PPAs to tenant electricity and building electricity to the integration of electricity supply into rental agreements.

If you are interested in this BSW-Solar service, please e-mail your company's legal inquiries trustfully to juralotse@bsw-solar.de, and please refer to this offer. Your **“subject matter”** should be **“Assignment to BSW-Solar's legal advice – Juralotse Solar”**. For being accepted, assignments will additionally have to meet the following conditions:

- A maximum of one question per submitted request
- Question is clear, short, understandable and completely formulated in writing
- Answering the question will not take longer than half a working hour*
- E-mail must include the billing address of your company and contact details for queries

**If answering the question takes longer than half a working hour, the law office will submit a free, individual offer to the BSW-Solar members before undertaking any further steps. BSW-Solar only is the intermediary for this service and does thus not assume any liability or warranty. The client agrees that the law office provides a copy of the consulting result to BSW-Solar. BSW-Solar will use the statements made therein in an anonymised form and for the work of the association only so that no connections may be drawn to a specific project or company.*

Notes on liability and use

BSW-Solar acts only as an intermediary of this service offer and is therefore free of any liability and warranty. The consulting client agrees that the firm will provide BSW-Solar with a duplicate of the consulting result. The statements made therein will only be used by BSW-Solar in anonymised form for the association's work, without a project or company reference being established.
